

**TO:** All customers of ICM Cooperation  
**FROM:** MCM/ICM Team #2225971  
**SUBJECT:** Summary of D&A system evaluation results of ICM  
**DATE:** February 21, 2022

---

Dear Customers,

It is of great honor to connect with you!

As the consulting team who develops models to evaluate D&A systems of ICM Corporation, we are writing to introduce the evaluation result of the D&A system of ICM. In our evaluation, professional mathematical methods were applied to improve the accuracy. By the means of Entropy Weight Method and Analytic Hierarchy Process, three important indexes: people, technologies and processes are selected to establish the evaluation system and Principal Component Analysis is applied to construct the evaluation model of maturity which has been proved to be accurate. Moreover, we make an evaluation on the effectiveness of D&A system which also made a good sense.

Up till now, we have considered a large number of indicators and conducted a large amount of simulation experiments to verify the model. At the same time, the D&A system of ICM can be well compatible with various types of dynamic data. In the complex and changeable environment, the D&A system can be competent for difficult and arduous tasks. All the results show that ICM Corporation's D&A system is advanced, reliable and safe, which could ensure your transactions with ICM logical and efficient. Please don't hesitate to use the D&A system. We do believe that it will bring long-term and huge benefits to you.

If you are satisfied with the D&A system, we will feel extremely pleased!

Sincerely yours,

Team # 2225971
